

# flexpoint™ HS-2R

## Product Overview

The HS-2R is the world's first Bluetooth 1D/2D barcode scanner and RFID reader, designed specifically for use in healthcare and medical environments.

In addition to reading all popular linear (1D) and matrix (2D) barcodes, the dual-functional HS-2R can read and write to HF RFID tags (13.56MHz) and supports a wide range of HF standards.

The highly-durable design of the HS-2R protects the device in demanding medical applications where exposure to liquid and multiple drops to hard hospital floors are common. Also, the HS-2R's medical-grade housing allows frequent cleanings with harsh cleansing solutions for germ-free use and without fear of plastic degradation.

The HS-2R thrives in healthcare applications such as blood tracking, point of care, drug inventory, reagent scanning, surgical part tracking and more.

**As with all JADAK products, the HS-2R can be tailored to meet specific customer requirements.**
